

**A COMPREHENSIVE SOLUTION TO SCAN,  
DECONTAMINATE AND CERTIFY REMOVABLE DEVICES**

**TYREX**

# 0 The Problem ....

Understanding the needs

---

- ❑ **35%+ of the security threats in the world are executed through Flash Drives. No industry is immune.**
- ❑ **Nearly 80% of those threats are causing widespread disruption to critical business operations.**

There are several ways to protect your organization:

- 1- **Train your Employees...** at least 90% of cyber-security incidents occur after a plug-in of an unknown flash-drive (remember *Stuxnet* in 2010!).
- 2- **Monitor endpoints...** but only works if you have total visibility of all potential devices and are able to disconnect such end points after the detection of a threat.
- 3- **Disable USB ports...** but there are always exceptions, and many maintenance operations can only be done through flash drives.

the only viable, realistic and easy to implement solution is to make sure all flash drives are ***sanitized***.

# 1 TYREX IN A NUTSHELL

About us and our values

- **Who are we?** Industry leader in removable devices decontamination
- **What do we do?** Protect organizations from cyber threats
- **How do we do it?** Rugged solutions with the most advanced detection and protection technologies

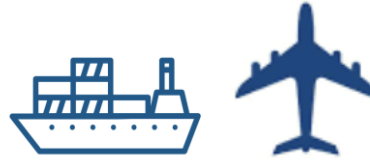

**3500+ STATIONS  
DEPLOYED WORLDWIDE  
TO 300+ CUSTOMERS**

## Many Verticals

**Industrial, Energy  
and Engineering**

**Transportation  
and logistics**

**Defense and  
critical infrastructure**

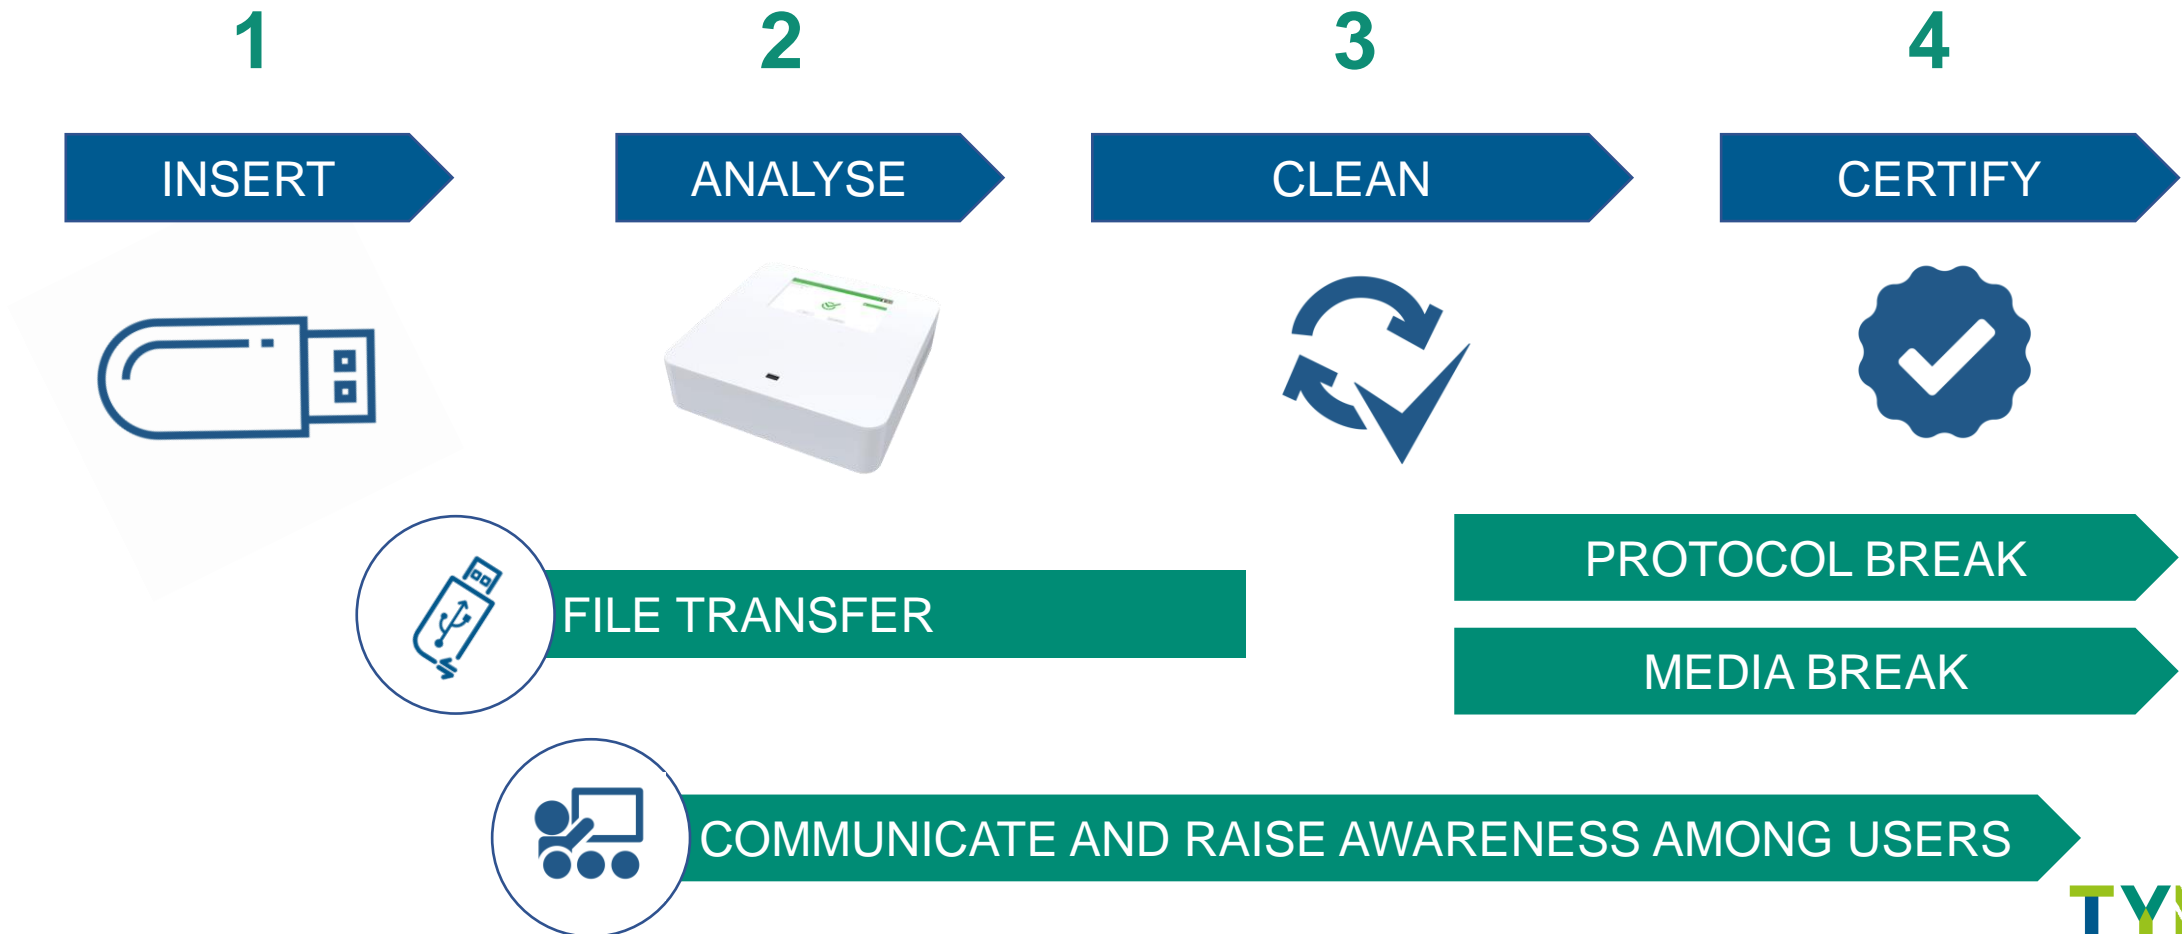

**Government and  
public services**

# 2 THE TYREX SOLUTION

A comprehensive solution

## SECURELY TRANSFER DATA FROM YOUR USB REMOVABLE DEVICES

TYREX offers a unique and comprehensive solution that includes **decontamination stations**, a **management server** and an **agent** prevents unauthorized access to files or devices which have not been authenticated by a TYREX station.

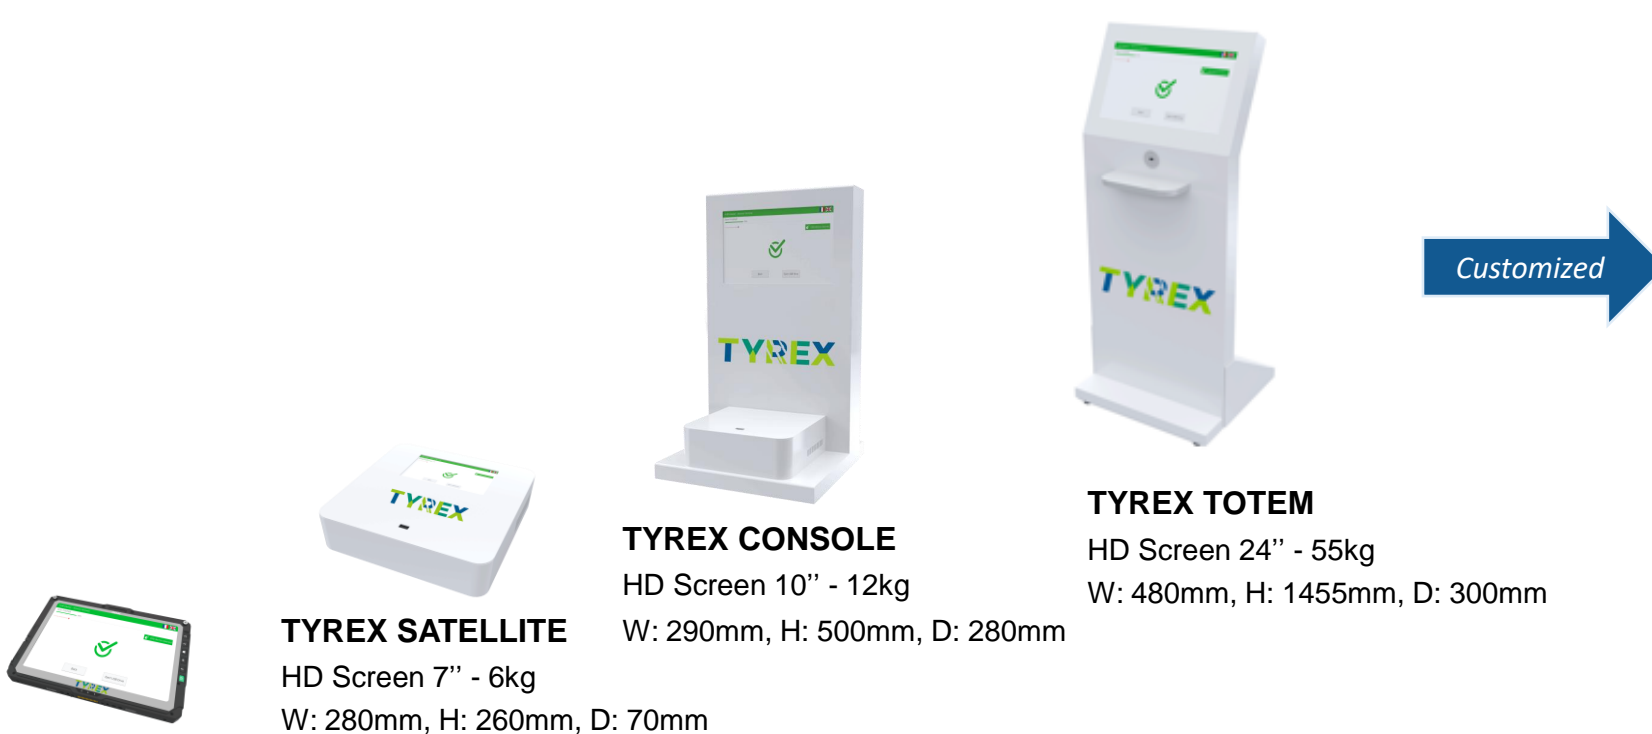

# 3 THE TYREX SUITE

4 Stations to face your needs

## 4 STATIONS WITH SHARED FEATURES AND THE SAME LEVEL OF PERFORMANCE

- Various formats, tailored to fit any environment and operational need.
- No programming or software installation needed, “plug and play” solution, intuitive and ready to use.

**TYREX**

# 4 THE TYREX SUITE: “inside the box”

A comprehensive solution

## Base Package:

### 4 current *Signature-Based* **ANTI-VIRUS** engines

Protect your organization from any removable-device known cyber security threats

### 2 in ROAD-MAP **ANTI-VIRUS** ENGINES

### 1 **Antimalware** *Static Analysis* Engine + AI

Protect your organization from unknown cyber security threats

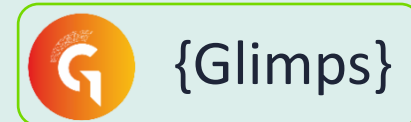

Developed by **Airbus Industries** this platform detects and analyzes advanced malicious content. It is integrated to TYREX Stations. (see Exhibits)

## Options:

### 2 **Antimalware** *Dynamic Analysis* Engines

Provide the highest level of analysis of malware variants

Include deeper investigations and sandboxing, further leveraging Machine Learning and AI.

# 5 THE TYREX SOLUTION: ARCHITECTURE

A 3 Tiers Architecture

**3 tools to secure removable device data exchange and ensure good governance of your infrastructure**

The Scanning Stations:  
Hazloc certified hardware; 2 to 6 anti-virus/anti-malware enabled; advanced scanning mode.

Management Server

The Management Server: for administration and supervision of all stations in a central location. SaaS or On-Premise deployment available; online or offline.

Workstation Protect Agent (Optional)

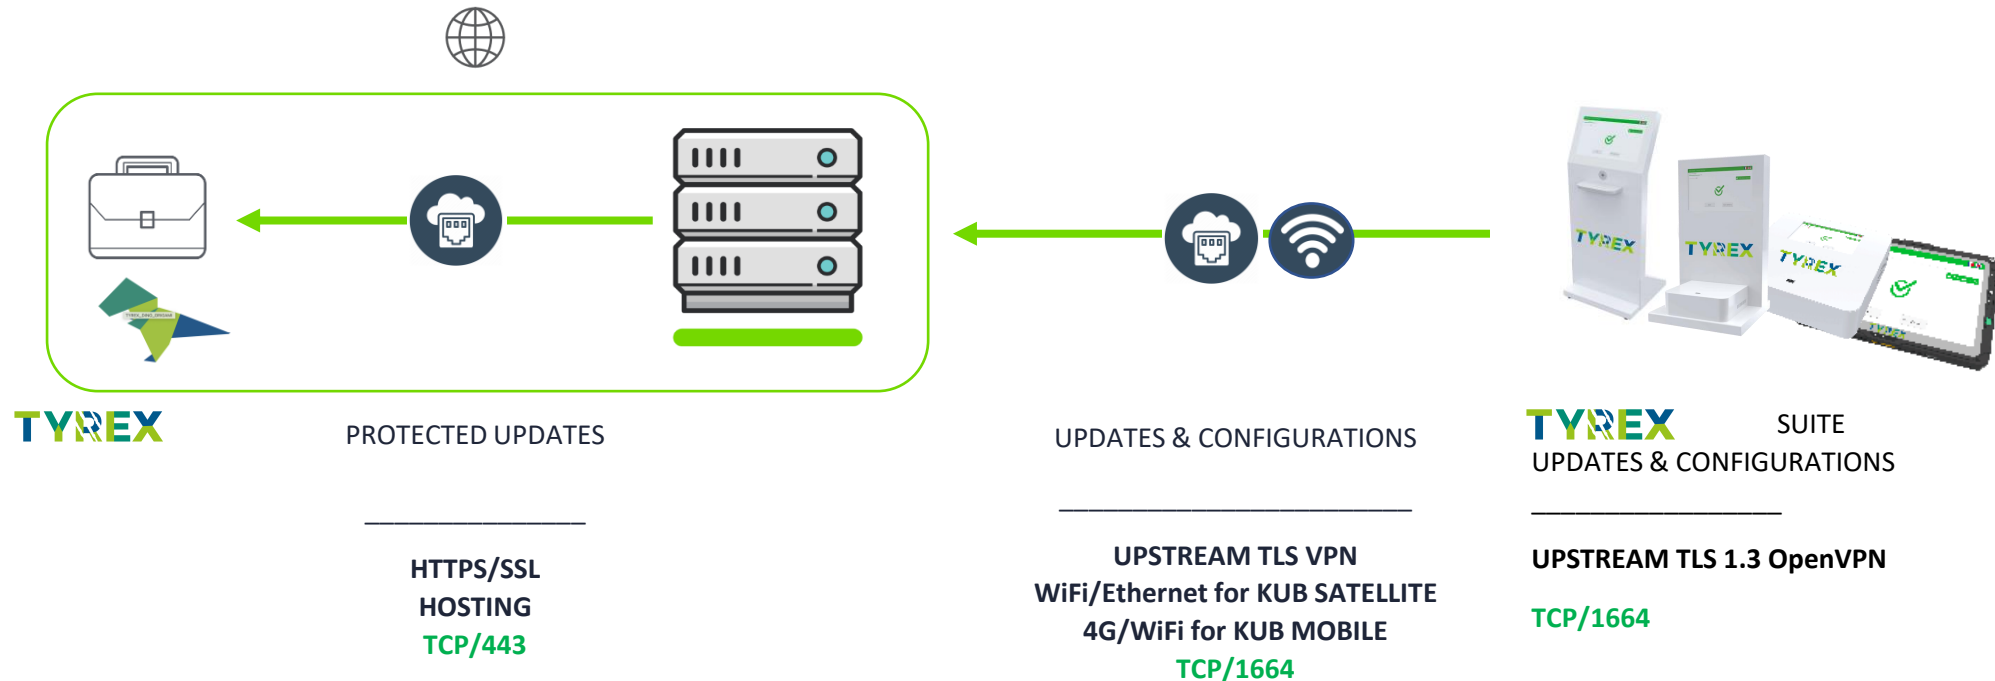

The Agent: a software program installed on all users' workstations. It prevents unauthorized access to files or devices which have not been first authenticated by the Scanning Station.

# 5 THE TYREX SOLUTION: “Hosted Solution”

A comprehensive solution

A limited number of TYREX Stations In House, with Management Server Hosted, For a “Plug and Play” deployment.

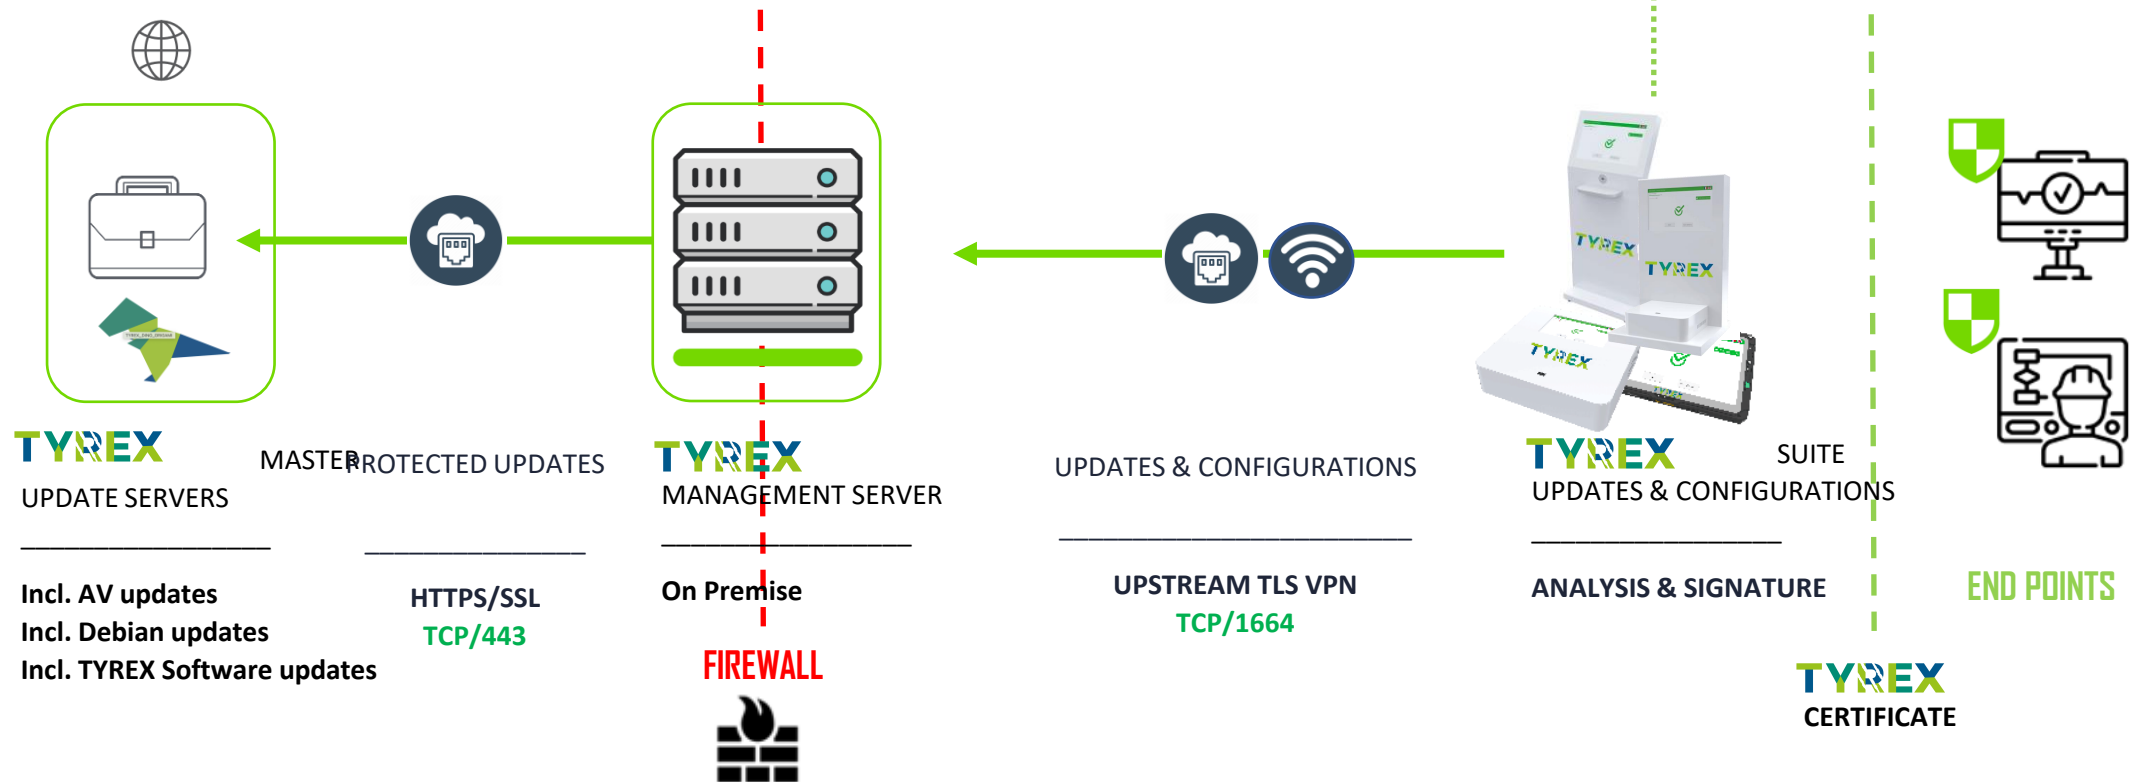

# 5 THE TYREX SOLUTION: “Server On-Premise”

A comprehensive solution

All TYREX Stations features available, in particular “protocol break” aka File transfer within Corporate LAN. APIs enabled to any SIEM tool.

A COMPREHENSIVE SOLUTION TO SCAN,  
DECONTAMINATE AND CERTIFY REMOVABLE DEVICES

THANK YOU 😊

# 6 EXHIBIT: PUBLIC PRICE LIST

Price should not be an issue

## All Products include the following:

- ☐ 2 Anti-Virus Engines
- ☐ 1 Anti-Malware Static Analysis engine
- ☐ 3 Year Hardware warranty
- ☐ Purchase:
  - 3 Year-License;
  - Includes Support & Maintenance Y1;
  - Y2 & Y3, 20% annual fee.
- ☐ Subscription: 3-Year contract (36 months)
- ☐ Delivery or Parts Return: D+20, D being date of "PO"

Reseller Conditions & Discounts policy  
based on volume and Partner's involvement  
in the process (high/low touch).  
Discounts can go from 15% up to 40%.

POC possible with DAP delivery for a fee of  
\$1,500, and free License for 2 weeks.
